COOKIES POLICY
2022/2023

Cookies used by Allithwaite Primary School
What are cookies?

Cookies are small files of letters and numbers downloaded on to a device when you access certain websites. Cookies allow some of our websites to recognise a user's device and provide content accordingly.

The law which applies to how cookies are used for storing information on your equipment (such as your computer or mobile device) has changed. We have provided you with information about how our site uses cookies, and how to disable them if you wish.

To make it clearer for you, we've divided how we use cookies into four different categories:

Strictly necessary cookies - these are the cookies that let your visitors browse through your site. They are also necessary for security reasons.

Setting-based - this type of cookie is used to remember a setting or preference, such as a colour or the size of text on a page.

Feature-based - this type of cookie is used to remember information about a feature on a page, such as the fact that you've watched a video clip or listened to an audio file previously.

Function-based - this type of cookie is used to remember information about how you use a website, and provide analytical information to site administrators.

Third-party - this type of cookie is created by a third-party, and can also fall under the categories of 'Setting', 'Feature' and 'Functional'. Where third-party cookies are present on our sites, we will attempt to be as upfront and clear as possible about their intended purpose.

Find more information about how you can delete cookies

Category		Purpose
Google Analytics	Function-based Third-party	Analytical information is captured in some areas of the main site, to help us improve services and better understand user requirements. This information is captured through a free service provided by Google (Google Analytics), using multiple cookies.
ForceFlashSite	Strictly necessary	When viewing a mobile site (old mobile under m.domain.com) it will force the server to display the non-mobile version and avoid redirecting to the mobile site
hs	Strictly necessary	Security
XSRF-TOKEN	Strictly necessary	Security
svSession	Function-based	Identifies unique visitors and tracks a visitor's sessions on a site
SSR-caching	Function-based	Indicates how a site was rendered.
TS*	Third-party	Security
TS01*******	Third-party	Security
TSxxxxxxxx (where x is replaced with a random series of numbers and letters)	Third-party	Security
